

M1330 – Remote Indicador

- Compatible with the majority of Fire Detection Panels, two inputs cover the whole operating voltage range (2-30 Volt).
- Elegant, efficient and pleasant design.
- Dimensions specially studied for minimum size without compromising visibility, easy and fast installation.
- Specially designed to be fitted over most electrical installation boxes.
- Two state-of-the-art, ultra-bright flashing 8mm red Led's, especially bended to cover 180° of visibility, essential in corridors.
- Flashing provides for fast and sure identification.
- Operation from 2 to 30VDC, with current regulator of 10 mA for a constant brilliance and consumption over full voltage range.
- SMD components technology for better reliability and economy.
- Advantageously replaces models M1362, M1364 and M1363H.
